

Horizontal Lifeline Systems

GREEN Horizontal Lifeline Systems are permanently installed, multi-span, horizontal lifelines designed to provide safe access and continuous fall protection to any operator requiring horizontal mobility.

All GREEN lifeline systems are engineered for operator safety and compliance with governing O.S.H.A. standards specific to your application.

Features

GREEN Horizontal Lifeline Systems have many unique features:

- Custom designed for single or multiple access points
- Beam, truss, and cable systems available
- Includes our "Insta-Rack" pedestal platform for easy access to the tops of vehicles
- Meets and/or exceeds O.S.H.A. requirements for fall protection

Access

Various access options include:

- A range of man-rated trolleys can be run along overhead beams, trusses, or cables for continuous fall protection
- Various platforms and gangways

Finishes

- Hot dipped galvanized
- Gray enamel / Safety Yellow
- Custom finishes available

Engineering

GREEN designs and custom-builds horizontal lifeline systems that meet even the most challenging requirements.

Our engineering team has over 150 years experience collectively and utilizes state-of-the-art CAD software.
