

## Spill Containment Pans

GREEN offers **Spill Containment Pans** that help keep railcar and tank truck loading areas clean by containing incidental spills that occur during liquid transfer operations.

Used individually or strung together, our spill containment pans are easily installed, and can be customized in length.

### Features

GREEN offers **Spill Containment Pans** that have many unique features:

- Pans may be placed end-to-end for continuous coverage
- Can be customized in length
- Effective in both permanent and portable applications
- Usable in hot or cold climates
- Non-porous design
- Can be plumbed to a remote holding tank to provide for collection of large capacity spills
- Available with outrigger pans for spill containment on both sides of the track
- Meets and / or exceeds local, state, and federal regulations

### Materials / Finishes

Available in:

- High-density Polyethelene
- Painted Steel
- Galvanized Steel

### Installation

A fast, clean installation includes:

- Limited site preparation
- No excavation
- No removal or modification to your current track required
- Ready for immediate use
- Can also be plumbed to a remote holding tank

### Engineering

Our engineering team has over 150 years experience collectively and utilizes state-of-the-art CAD software.
